

Problem Statement

Project: Import Data using Transform Maps (Spreadsheet)

Platform: ServiceNow

Problem Definition (5 W's)

Question	Answer
Who	ServiceNow administrators and HR / IT support teams
What	Bulk employee data arrives in spreadsheets and must be loaded into ServiceNow
When	During onboarding drives, migrations and periodic data refresh
Where	ServiceNow instance (User table / custom tables)
Why	Manual entry is slow, error-prone and creates duplicate records

Problem Statement Template

Item	Statement
I am	A ServiceNow administrator
I'm trying to	Load hundreds of employee records from a spreadsheet into ServiceNow
But	Typing each record by hand takes hours and mistakes creep in
Because	There is no automated mapping between the spreadsheet columns and ServiceNow fields
Which makes me feel	Frustrated, unsure about data quality, and short of time
