

Empathy Map

Project: Import Data using Transform Maps (Spreadsheet)

Platform: ServiceNow

Says	Thinks
"I need this data in the system today." "Can we avoid re-typing everything?"	Will I create duplicate users? Is there a faster, safer way?
Does	Feels
Copies data row by row Cross-checks Excel against the User table	Stressed by repetitive work Worried about wrong or missing data
Pains	Gains
Time-consuming manual entry Duplicates and typos No audit trail of what was loaded	One-click bulk import Clean, accurate records Import history and logs for review
