

Methodology and Results

Project: Import Data using Transform Maps (Spreadsheet)
Platform: ServiceNow

7.4 Methodology

Step	Activity
1	Prepare spreadsheet with standard headers
2	Create Data Source and attach the file
3	Load data into an Import Set table
4	Create Transform Map and Field Maps
5	Set Coalesce field
6	Run the transform
7	Verify records and logs

7.5 Results

Measure	Outcome
Records imported	All valid rows loaded into the target table
Duplicates	None on re-import (Coalesce)
Errors	Invalid rows captured in Import Log
Time	Minutes instead of hours of manual entry

7.6 Conclusion

Import Sets with Transform Maps provide a reliable, reusable and auditable way to bring spreadsheet data into ServiceNow. The approach reduces effort, improves accuracy and scales to larger data volumes.
