

Environment Setup and Data Loading

Project: Import Data using Transform Maps (Spreadsheet)

Platform: ServiceNow

5.1 Environment Setup

1. Sign in to developer.servicenow.com and request a Personal Developer Instance (PDI).
2. Log in to the instance as admin.
3. Prepare the spreadsheet with these headers in row 1: Employee ID, First Name, Last Name, Email, Department, Title.
4. Save the file as .xlsx (or .csv).

5.2 Create the Data Source

Navigate to **System Import Sets > Administration > Data Sources > New**.

Field	Value
Name	Employee Data Source
Import set table label	Employee Import
Type	File
Format	Excel (.xlsx)
File retrieval method	Attachment
Header row	1

Attach the spreadsheet using the paper-clip icon and save the record.

5.3 Load Data into the Import Set

1. Open the Data Source.
2. Click **Load All Records**.
3. ServiceNow creates the Import Set table (for example u_employee_import) and loads every row.
4. Open the Import Set and confirm the row count matches the spreadsheet.
